STATEMENT OF THE SUBSTANCE OF THE INTERVIEW

Commissioner for Patents
PO Box 1450
Alexandria, VA 22313-1450

Date: November 7, 2007

Sir:

On October 29, 2007 the Applicant, by and through the undersigned counsel, held an Examiner-initiated teleconference. No prior art was discussed. Claims 17, 22-23 and 25 were discussed. Applicants agreed to an Examiner's amendment to amend the last limitation of claim 17 as follows – wherein, when the computer system is powered off, the radio module scans for available wireless access points, and indicates the availability of a wireless access point, ~~both while the computer system is powered off.~~

Further, Applicants agreed to an Examiner's amendment to amend the second to last limitation of claim 22 as follows – wherein the seek logic commands the power supply to power the radio module responsive to the actuation of the electrical switch, the command only when the computer system is powered-off, and the command for the same amount of time that the electrical switch is activated, thus requiring the user to hold electrical switch in the actuated position during a seek period of the ~~media access controller~~ radio module.

Further still, Applicants agreed to an Examiner's amendment to amend the first limitation of claim 23 as follows – a power supply enabled input signal, wherein the power supply enabled input signal is asserted to indicate that the ~~notebook computer~~ system is powered-on.

Appl. No. 09/912,784
Statement of the Substance
of the Interview dated November 7, 2007

Finally, Applicants agreed to an Examiner's amendment to amend the first limitation of claim 25 as follows – a power supply enabled input signal, wherein the power supply enabled input signal is asserted to indicate that the notebook computer system is powered-on.

Respectfully submitted,

/Mark E. Scott/
